

1. Application range

Nominal pressure:	PN 2,5 MPa
Body max test pressure:	PT: 3,75 MPa
Seat max test pressure:	PT: 2,8 MPa
Maximum allowable temperature:	TMA: 250°C
Tightness testing pressure (gas test according to PN-EN 12266-1):	PT: 0,6 MPa

DN	PN	Body test pressure PT	Maximum allowable working pressure PMA at related maximum allowable temperature TMA				
			20 °C	100 °C	150 °C	200 °C	250°C
mm	MPa	MPa	MPa				
40-600	2,5	3,75	2,5	2,33	2,17	1,94	1,78

2. Basic materials

Body, bonnet, wedge, gland flange:	cast carbon steel GP-240GH (1.0619)
Body and wedge seat:	cast carbon steel GP-240GH + 13Cr
Stem:	stainless steel X20Cr13 (1.4021)
Gland /stem seal:	graphite + 1.4301
Body and bonnet gasket:	reinforced graphite
Bolts/ nuts:	alloy hardened steel A193 B7/carbon hardened steel A194 2H
Optional material design:	body made of acid resistant cast steel GX5CrNiMo19-11-2 (1.4408)

3. Design

Connection:	flanged DN40 – DN600, face type B1 acc. to PN-EN 1092-1 butt weld ends S 1½" – S 24"
Drive type:	flanges acc. to ANSI at the client's request standard version – with a hand-wheel optional version – with an electric drive AUMA or one indicated by the client
Tightness class:	in standard class C according to PN-EN 12266 -1 for DN40-500, for DN600 class D optional: class A and B with an additional charge

4. Characteristics

Wedge gate valves are designed for general use pipelines in industrial systems, for the second group of fluids. They are designed to cut off the flow of industrial water, drinking water, steam, air. They are also used in the chemical industry (for non aggressive and non toxic liquid and gas substances), petrochemical and refinery industries, coke and chemical industry (coke-oven gas), extractive industry, mining industry, mining and metallurgical industry (post-floatation wastes). They can be installed on pipelines in a vertical or horizontal position and operate only when fully open or closed.

5. Requirements and testing

Flanges connecting sizes acc. to PN-EN 1092-1.
Face to face acc. to PN-EN 558-1.
Pressure testing acc. to PN-EN 12266-1.
Certificate of conformity in acc. with PN-EN 10204.
Design acc. to PN-EN 12516-2.
Valves have been submitted for appraisal of conformity according to the directive Pressure Equipment Directive 97/23/EC.

6. Directions for ordering

When giving your order you should supply the following information:

- medium,
- the maximum operating pressure,
- the maximum operating temperature,
- type and size of connections.

7. Additional information

- 24 months warranty compulsory acc. to the conditions which are in the manufacturer's warranty card.
- The manufacturer is able to undertake inspections and repairs of the fittings as well as replacement of the internal elements if required.
- All the requirements concerning the quality and technical specifications of the fittings should be taken into consideration in your order. With the fittings we provide specification sheets (technical and quality) as follows: standard – conformity declaration, Installation, Operation and Maintenance Manual, at the client's request – certificate 2.2 or 3.1.

We reserve the right to introduce some technical changes without notice.
